

Why Free?

What's for free?

myITfixed.co.uk has partnered with Comodo (www.comodo.com) to deliver this highly rated firewall free as a cornerstone of our initiative to empower consumers to create a safe and trusted online experience whenever you go online. This new initiative will also make available other free desktop security tools to avoid leading threats such as phishing attacks.

The free tools include: the ability to authenticate web identities in real time (www.vengine.com), free email certificates for secure email encryption, secure backup for backing up files on your pc and iVault for password management and launching secured internet sessions. Together, all these solutions could cost upwards of £250 per year to achieve a comparable level of safety.

All these products are offered free for the lifetime of the PC - without any annual subscription fees or licenses.

Why is it free?

How can we stay in business by giving away high quality solutions that all other software vendors sell. Simply, myITfixed and Comodo's main revenue comes from other business, and it benefits us and the entire world computing community to have malware eliminated.

The more consumers are comfortable being online and shopping online, the more businesses will be created needing our services.

It's the ultimate win/ win.

Consumers get business class desktop security solutions for free, myITfixed get to enhance our reputation as a business you can trust and Comodo receive increased awareness of their brand
